Current Cpr Guidelines 2012 American
RECOVER Guidelines Veterinary CPR guidelines by experts, for everyone. Less than 6% of dogs and cats that experience cardiopulmonary arrest (CPA) survive to hospital discharge, while the survival rate in people is over 20%.

Current RECOVER Guidelines - RECOVER Initiative
Cardiopulmonary resuscitation (CPR) is an emergency procedure that combines chest compressions often with artificial ventilation in an effort to manually preserve intact brain function until further measures are taken to restore spontaneous blood circulation and breathing in a person who is in cardiac arrest. It is recommended in those who are unresponsive with no breathing or abnormal...

Preparedness and Prevention. With the documented rate of successful resuscitation by CPR and survival to discharge being approximately 6%, the veterinary team must be prepared for CPA to maximize chances of resuscitation. Preparedness begins with obtaining the knowledge behind CPR as well as psychomotor (physical) training for performing it.

Algorithms for Advanced Cardiac Life Support 2019 Feb 7, 2019. Version control: This document is current with respect to 2015 American Heart Association® Guidelines for CPR and ECC. These guidelines are current until they are replaced on October 2020.

Algorithms for Advanced Cardiac Life Support 2019
Myth: Proper CPR technique should include frequent use of “mouth to mouth” in between compressions. In fact, the 2010 guidelines set out by the American Heart Association (AHA) do not recommend breathing for someone while performing CPR (and not for your health, as you might think, but for the person experiencing cardiac arrest’s chances of survival).

CPR Does Not Require "Mouth To Mouth" - Today I Found Out
The mission of the Citizen CPR Foundation is to save lives from sudden cardiac arrest by stimulating effective community, professional and citizen action.

Male circumcision consists of the surgical removal of some, or all, of the foreskin (or prepuce) from the penis. It is one of the most common procedures in the world. In the United States, the procedure is commonly performed during the newborn period. In 2007, the American Academy of Pediatrics (AAP) convened a multidisciplinary workgroup of AAP members and other stakeholders to evaluate the ...
